Was ist das überhaupt?

Richard Stallman² definiert **freie Software** so³:

“The word *free* in our name does not refer to price; it refers to freedom.

- ▶ First, the freedom to copy a program and redistribute it to your neighbors, so that they can use it as well as you.
- ▶ Second, the freedom to change a program, so that you can control it instead of it controlling you; for this, the source code must be made available to you.”

²Gründer der Free Software Foundation, 1985

³<https://www.gnu.org/bulletins/bull1.txt>

Was bringt euch das?

- ▶ Volle Rechte an gekauften Programmen
- ▶ Kontrolle über die eigenen Daten
- ▶ Keine Abhängigkeit von bestimmten Unternehmen

Ein paar Beispiele...

- ▶ GNU-Projekt
 - ▶ GNU General Public License
 - ▶ GNU/Linux-Betriebssystem (bekannt unter Linux)
 - ▶ GCC (GNU Compiler Collection)
- ▶ Firefox, Chromium
- ▶ LibreOffice, GIMP, Blender
- ▶ LaTeX, MySQL

⇒ Fast alle im Alltag gebräuchlichen Programme gibt es auch als freie Software.⁴
